D2000 UPM process

D2000 UPM

!!! WARNING: Process D2000 UPM is substituted by D2000 CNF !!!

The **D2000 UPM** (User Profile Management) process is an on-line process of the D2000 system. It allows defining access of individual users to system objects and system activities. Working with the process is intended exclusively for the system administrator.

Note

- For working with the D2000 UPM see the topic D2000 UPM process environment.
