ActTime

| **Declaration** | ```
D2Time (_stdcall *ActTime)(void);
``` |
| **Description** | The function returns the current system time in the D2000 System format (the D2000 System saves the time as a real number with the double accuracy so that the integer part of such a real number is the number of seconds since 1.1.1972 and the decimal part specifies milliseconds). |
| **Return value** | Current system time. |
