

HI_SetGraphButtonsToolTip

%HI_SetGraphButtonsToolTip function

Function The function **%HI_SetGraphButtonsToolTip** sets the text displayed as a tooltip for [user-defined buttons](#) placed left to the table containing the descriptions of graphic flows in the display of [Graph](#) or [XY Graph](#) types ([Control function](#)).

Declaration

```
%HI_SetGraphButtonsToolTip(  
    INT in refId,  
    TEXT in text  
)
```

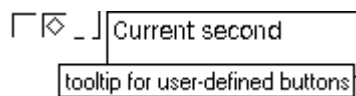

Parameters

refId	Reference to displayer (reference variable).
text	Tooltip text for all buttons.

Description The function sets the text of tooltip for all user-defined buttons placed left to the description of graphic flows in the display of [Graph](#) or [XY Graph](#) types. If a button is enabled, it generates the picture event [OnGraphBtnClick](#) after clicking the button.

Example

```
%HI_SetGraphButtonsToolTip(_Graph, "tooltip for user-defined buttons")
```
