

# HI\_SetGraphButtonsToolTip

## %HI\_SetGraphButtonsToolTip function

### Function

The function **%HI\_SetGraphButtonsToolTip** sets the text displayed as a tooltip for user-defined buttons placed left to the table containing the descriptions of graphic flows in the displayer of **Graph** or **XY Graph** types ([Control function](#)).

### Declaration

```
%HI_SetGraphButtonsToolTip(  
    INT in refId,  
    TEXT in text  
)
```

### Parameters

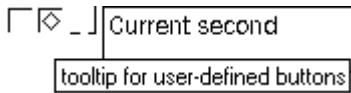

<b>refId</b>	Reference to displayer ( <a href="#">reference variable</a> ).
<b>text</b>	Tooltip text for all buttons.

### Description

The function sets the text of tooltip for all user-defined buttons placed left to the description of graphic flows in the displayer of **Graph** or **XY Graph** types. If a button is enabled, it generates the picture event [OnGraphBtnClick](#) after clicking the button.

### Example

```
%HI_SetGraphButtonsToolTip(_Graph, "tooltip for user-defined buttons")
```
