

HI_SetToolTipText

%HI_SetToolTipText function

Function The function **%HI_SetGraphButtonsToolTip** sets a text displayed as a tooltip for given graphic object ([Control function](#)). The text may be divided into rows by inserting the character CR (%Chr(13)) or LF (%Chr(10)) to it.

Declaration

```
%HI_SetToolTipText(  
    INT in refId,  
    TEXT in toolTipText  
)
```

Parameters

refId	Reference to graphic object (reference variable).
toolTipText	Text to display in tooltip.

Example

```
%HI_SetToolTipText(_Btn,"Hello Tom!" + %Chr(10) + %Chr(10) + "I am  
sending you..." + %Chr(10) + %Chr(10) + "John")
```

The text will be displayed as follows:
Hello Tom!

I am sending you...

John
