

LST_GO_PAGE

LST_GO_PAGE action

Function

Action passes onto the first page in the list of objects according to its sequential number.

Declaration

LST_GO_PAGE h, data, pgNr

Parameters

h	in	Identifier of the <i>Int</i> type - unique handle on created list of objects.
data	output	Identifier of the entire structure - the structure must consist of 7 or 9 columns, as defined in the <i>SD_System_ObjectInfo</i> .
pgNr	in	Identifier of the <i>Int</i> type - sequential number of the required page.

Description

Action passes onto the first page in the list of objects according to its sequential number.

If entered handle on list does not exist, event generates an error **ERR_NO_DATA**. If required page does not exist, it gets back zero number of rows to output parameter **data**.

Example

Work with list of objects (LST... actions).
