

# Types of Input Boxes (Work with D2000 HI)

## Types of input boxes

One of the following input boxes according to the value type in given cell of structure (structured variable or database table) is displayed during its editing.

<input type="text" value="True"/>	Editing Boolean values.
<input type="text" value="115.5"/>	Editing numerical values.
<input type="text" value="Surovina A"/>	Editing text values.
<input type="text" value="85"/> ▾	Editing object references. Clicking the arrow button, placed right from the object value, will open the dialog box for this object.
<input type="text" value="D.Diagram01"/> ▾	References to a graphic information window.
