

IsValidValue

IsValidValue function

Function

The function tests whether DDE references "D_2000|STATUS!objname" and "D_2000|ARCH_STATUS!blname" return the valid value. The result is a *Boolean* value. If DDE reference returns a valid value, the function returns TRUE. If not, it returns FALSE.

Declaration

```
= IsValidValue(DDEreference)
```

Parameter

DDEreference	DDE reference in the format D_2000 STATUS!objname or D_2000 ARCH_STATUS!blname .
--------------	--

Example

```
= IsValidValue(D_2000|STATUS!U.Kx_O2_Ref_Plyn)
```
