

IsArchBlock

Function The function returns TRUE, if the particular value (**N**-th in order) from an archive block **blname** has been written into the archive database during the time when the archiving was disabled - by Stop condition. If not, it returns FALSE.

Declaration

IsArchBlock(DDereference)

Parameters

DDereference	DDE reference in the format D_2000 ARCH_STATUS!blname_N or cell address, which contains the reference.
--------------	--

Example = IsArchBlock(D_2000|ARCH_STATUS!!WB1_Blok2_10)
