

# ArcCos

## %ArcCos function

---

**Old name** %ArcCosR

**Function** Inverse function to cosine. The result is a real value in degrees.

**Declaration**

```
REAL %ArcCos(  
    REAL in Arg  
)
```

**Parameters**

<b>Arg</b>	Function argument - must be within the interval -1 to +1.
------------	---

**Example**

```
%ArcCos(arg)
```
