

# ESL Interface - dialog box

## ESL Interface - configuration dialog box

The configuration [dialog box](#) for the ESL interface consists of three parts (pages) containing related parameters.

[General properties](#)

[Groups](#)

[Parameters](#)

### General properties

#### Description

A text string describing the event. Maximum: 128 characters. Possibility to use the [Dictionary](#) (to open press **CTRL+L**).

#### Transformation palette

Selection of an index for transformation palette. See the topic [Transformation palette](#).

#### Value type

The value of the event is always of **Int-Integer** type. Event value represents the number of running instances of the given event.

### Parameters

The tab contains the editor of the ESL script to write a declaration of interface procedures. The meaning of the buttons is:

- selects and inserts the name of the structure definition at the declaration of the formal parameter.

- the check of syntax, the results are described in the list below the editor.
