StructStatMAX

%StructStatMAX function

Function

The function returns the maximal value from valid values of a given structured variable column. Row range is defined by the parameters *first_row* a *last_row*.
The result is a real number.

Declaration

```
REAL %StructStatMAX(
       in StructVar^Column,
   INT in first_row,
   INT in last_row
 )
```

Parameters

StructVar	Structured variable.
Column	Structured variable column.
first_row, **last_row**	Range of rows in the column.

Example

```
 %StructStatMAX(SV.Structure^Int, 4, 6)
```
