	Edits objects in the process D2000 CNF .
	Cuts out a selected graphic object (selection of graphic objects) and inserts into Clipboard.
	Copies selected graphic object (selection of graphic objects) to the Clipboard.
	Pastes copied graphic object (selection of graphic objects) from the Clipboard into the picture.
	Copies object's parameters. If a graphic object is selected, its parameters will be copied to the clipboard. If no graphic object is selected, the default parameters for all graphic objects will be copied to Clipboard. If several graphic objects are selected, the parameters of the active object will be copied to the clipboard. Object position parameters (except for object size) and text are not copied.
	Sets object parameters - object parameters from Clipboard will be set if the selected object(s) are the same type as the graphic object, the parameters of which were copied to Clipboard. Object position parameters (besides the object size) and text are not copied.
	Sets common object parameters - object parameters from Clipboard will be set for the selected object(s). Position parameters (except for size) of text are not to be set.
	Undo - cancels last performed action.
