Buttons: OK, Cancel

### Description \*

A Description of the flow. The description is to be displayed in the descriptive table of the XY graph - the column **Name**. If no description is defined, the table cell will show an empty string. The description may be defined by means of the function [%HI\\_SetGraphInfo](#) from the picture script.

### Units \*

Technical units of the flow. Technical units are to be displayed in the descriptive table of the XY graph - the column **Units**. If technical units are not defined, the table cell will show an empty string. Technical units may be defined along with the description by means of the function [%HI\\_SetGraphInfo](#) from the picture script.

### Draw

Flow drawing types:

- **Line** - shows/hides the line
- **Fill** - shows/hides the fill
- **Marker** - shows/hides markers

### Line type

Line type for links between flow values:

- **Straight**
- **Smooth**

### Assigned axis

Selection of an axis that is to be assigned to the flow. Assigning an axis is performed by selecting of corresponding axis number (from 1 to 20) from the **Axis number** item.

## Drawing

Style of drawing in regard to zero value on the y-axis.

- **From X axis** - drawing starts from the x-axis
- **Above 0** - drawing starts from 0 on the y-axis upward
- **Below 0** - drawing starts from 0 on the y-axis downward

## Line color

Line color is defined by selection from the [color palette](#) opened after clicking the arrow button placed right from the color sample.

## Fill color

Fill color is defined by selecting a color from the [color palette](#) opened after clicking the arrow button placed right from the color sample.

The parameter is enabled if the parameter [Fill](#) is checked.

## Fill pattern

Fill pattern is defined by a selection of a pattern from the patterns list opened after clicking the arrow button placed right from the pattern sample.

The parameter is enabled if the parameter [Fill](#) is checked.

## Marker color

Color of flow markers is defined by selecting a color from the [color palette](#) opened after clicking the arrow button placed right from the color sample. The parameter is enabled if the parameter [Marker](#) is checked.

## Line

Selection of a line style (solid line, dashed line, ...).

The parameter **Highlighted** allows drawing a thick line (doubled one).

## Marker

Selection of a marker type.

The parameter **Highlighted** allows drawing markers of double size.

\* The parameter cannot be configured in the [D2000 HI](#) process.
