

FIO_Exist

%FIO_Exist function

Function

The function determines whether the specified file/directory exists.

Declaration

```
BOOL %FIO_Exist(  
    TEXT in name,  
    BOOL in bCheckDir := @FALSE  
)
```

Parameters

name	The name of the file (directory)
_bCheckDir	@TRUE - test the directory @FALSE - test the file

Return value

@TRUE - the file exists, @FALSE - the file doesn't exist.

Note

The function checks whether the file (directory) exists - attempts to open it for reading.
