

AuthUser

%AuthUser function

Function

The function checks a user (set in the function parameters) against the D2000 System. It returns @TRUE providing that:

- a user name meets the conditions of an object of the [User](#) type,
- MD5 is a 32 character string,
- a password is correct.

@FALSE - above mentioned conditions are not fulfilled.

Declaration

```
BOOL %AuthUser(  
    TEXT in UserName,  
    TEXT in pwdMD5  
)
```

Parameters

UserName	the D2000 System username.
pwdMD5	MD5 Hash of the D2000 System password.

Example

```
BEGIN  
    IF %AuthUser("Disp11101", "d41d8cd98f00b204e9800998ecf8427e") THEN  
        MESSAGE "Login ok."  
    ENDIF  
END
```
