

# FIO\_Write

## %FIO\_Write function

---

**Function**

The function writes the specified text to a file.

**Declaration**

```
BOOL %FIO_Write(  
    INT in handle,  
    TEXT in text  
)
```

**Parameters**

<b>handle</b>	Return value of a file, returned by the functions <a href="#">%FIO_Create</a> or <a href="#">%FIO_OpenAppend</a> .
<b>text</b>	Text to write.

**Return value**

@TRUE - text written, @FALSE - cannot write the text.
