Passing the Report Parameters into a Report of Crystal Report Type (Work with D2000 HI)

Passing the report parameters into a report of Crystal Report type

Warning: Since the version D2000 V10.037, the object **Reports** is not supported and the access to it is removed in the D2000 HI environment.

During the report configuration in **Crystal Report** environment, there may be defined the variables by the name. At report opening or editing its parameters, process D2000 HI sets values of the following variables:

Name of report variable	Meaning
S_TIME	Beginning of time interval.
E_TIME	End of time interval.
NUM1	First numeric parameter.
NUM2	Second numeric parameter.
STRING	Value of text parameter.

Report may be controlled in process D2000 HI by means of proper report configuration considering its parameters.
