

TraceBufferHexFile

Declaration

```
void (_stdcall * TraceBufferHexFile)(HOBj LnID, char *FileName, unsigned  
int MaxFileSize, void *Data, unsigned int Len);
```

Parameters

LnId	Line ID .
FileName	File name.
MaxFileSize	Maximal size of log file.
Data	Pointer to a buffer with data to be saved.
Len	Number of bytes to be saved.

Description

This procedure enables to save the received or sent data as hexadecimal character into log file that is defined by *FileName* parameter. The files are saved to [Trace](#) directory of an application.
Note: *FileName* can also contain directory names, e.g. "subdir1/mylog.txt" or "../anotherdir/mylog.txt".
