

TraceComTextFile

Declaration

```
void (_stdcall * TraceComTextFile)(HOBJ LnID, char *FileName, unsigned int  
MaxFileSize, char *Str);
```

Parameters

LnId	Communication line ID .
FileName	File name.
MaxFileSize	Maximal size of log file in MB.
Str	Array of characters that will be saved into log file.

Description

The procedure enables to save any record to the log file that is defined by *FileName* parameter. The files are saved into [Trace](#) directory of an application.

Note: *FileName* can also contain directory names, e.g. "subdir1/mylog.txt" or "../anotherdir/mylog.txt".
