CreateThread

Declaration

```
unsigned int (_stdcall * CreateThread)(void * Proc, void * Par);
```

Parameters

Proc	Address of the executive procedure of a new thread. The procedure must be defined as follows: `void _stdcall ProtocolThread(void * Par)` *Warning:* the *Stdcall* call convention is required !!!
Par	Pointer to the parameters transferred to a new thread.

Description

The function creates and initializes a new thread.

Return value

ID of the thread.
