

HI_SetAlarmData

%HI_SetAlarmData function

Function

The function sets a logical group and mask to filter alarms displayed in displayer of [Alarms](#) type.

Declaration

```
%HI_SetAlarmData(  
    INT in refId,  
    HOBJ in refToAlGroup  
    [, TEXT in _mask],  
)
```

Parameters

refId	Reference to displayer (reference variable).
refToAl Group	Reference to alarm logical group .
_mask	Optional parameter - mask for lists of alarms. If the parameter is not specified or its value is "" (empty string) the function keeps the previous masks specified for all alarm lists (critical, uncritical and blocked).
