

SetDragDataText

%SetDragDataText, %GetDragDataText functions

Function

Function **%SetDragDataText** sets a text as a source of data for Drag&Drop.

Function **%GetDragDataText** returns a text string that is transferred during Drag&Drop. If the function [%IsDragData\(0, _CF_TEXT\)](#) does not return @TRUE, the return value of this function is undefined.

Declaration

```
%SetDragDataText(  
    INT in refId,  
    TEXT in text  
)
```

```
TEXT %GetDragDataText(  
    INT in refId  
)
```

Parameters

refId	It always requires 0.
text	A text, which represents a source of data.

Return value

TEXT - returns the text value that is transferred during Drag&Drop.
