Autoconfiguration

Autoconfiguration of bitmaps

To add several bitmaps or graphic files of the types JPEG (*.JPG,*.JPEG) and TIFF (*.TIF) into the system by means of the process D2000 GrEditor, proceed as follows:

1. Copy the files you want to add into the directory **Bitmaps** (a subdirectory of the application directory).
2. In GrEditor, select the item **Autoconfiguration of bitmaps** from the menu **Utils**.
3. The bitmaps will be added into the system and they are available in GrEditor.
