

XML_AddTextNode

%XML_AddTextNode function

Function The function adds a text XML element.

Declaration

```
INT %XML_AddTextNode(  
    INT in node,  
    TEXT in text  
)
```

Parameters

node	Handle to parent XML node.
text	Text contents of new element.

Return value Handle to the added XML element.

Description The function adds defined text to the given parent XML node. Parent node can be an element.

Example

```
INT _doc  
_doc := %XML_CreateDocument()  
INT _el  
_el := %XML_AddElement(_doc, "element")  
INT _txt  
_txt := %XML_AddTextNode(_el, "text")
```
