

HI_GetPixelRGB

%HI_GetPixelRGB function

Function

The function retrieves the RGB value of the color of given pixel in the picture.

Declaration

```
INT%HI_GetPixelRGB(  
    INT in x,  
    INT in y  
)
```

Parameters

x	Distance of the pixel from the left picture margin.
y	Distance of the pixel from the bottom margin of the picture.

Description

The function retrieves the RGB value of the color of the pixel, the position of which is defined by the parameters `_x` and `_y`.

Note

The function [%MakeRGB](#) allows to form the color from individual color components.
