

Object configuration properties

Dialog window displays the parameters that are assigned to some configuration properties of objects and their change. It opens through the [pop-up menu](#) - an item **Used configuration properties**, in the [selection window](#) or from the [configuration window](#) of object by clicking with right mouse button -> the item **List configuration properties**.

Configuration properties

Object	HOB	Configuration property	Application module	Application module parameter	Valid
TeZoznam.SV.Zaznamy	1342179171	tStartValue[Row= 4 and Col= 3]/StartValue	TeZoznam		Yes
TeZoznam.SV.Zaznamy	1342179171	tStartValue[Row= 5 and Col= 1]/StartValue	TeZoznam		Yes
TeZoznam.SV.Zaznamy	1342179171	tStartValue[Row= 5 and Col= 4]/StartValue	TeZoznam		Yes
TeZoznam.SV.Zaznamy	1342179171	tStartValue[Row= 1 and Col= 2]/StartValue	TeZoznam	Priezvisko	Yes
TeZoznam.SV.Zaznamy	1342179171	tStartValue[Row= 2 and Col= 3]/StartValue	TeZoznam		Yes
TeZoznam.SV.Zaznamy	1342179171	tStartValue[Row= 3 and Col= 1]/StartValue	TeZoznam		Yes

☐ Only used

Assign parameter

Remove parameter

Back

In these dialog window you can change or remove the assignment of parameter to one or more object configuration properties.
If the dialog box is opened through the [pop-up menu](#) from the selection window or from the [extended actions](#) of the object *Application module* only the parameterized configuration properties will be displayed.

The column **Valid** shows whether the parameter assigned to some object configuration property exists. User can find out a useful information on objects of which parameterization should be updated because of changes in [parameters of application module](#).
