

# JSON\_FreeObjectHandle

## %JSON\_FreeObjectHandle function

---

**Function** Releases a handle to the JSON object.

**Declaration**

```
%JSON_FreeObjectHandle(  
    INT in handle  
)
```

**Parameters**

<b>handle</b>	Handle to JSON object.
---------------	------------------------

**Return value**

None

**Description**

Function releases a handle to the JSON object.

Exception is thrown if the handle to the object is invalid.

**Example**

```
INT _obj  
_obj := %JSON_CreateObject()  
  
%JSON_FreeObjectHandle(_obj)
```
