

JSON_ArrayToString

%JSON_ArrayToString function

Function

Gets the text representation of the JSON array.

Declaration

```
TEXT %JSON_ArrayToString(  
    INT in handle,  
    BOOL in pretty  
)
```

Parameters

handle	Handle to JSON array.
pretty	Multi-line formatting of output

Return value

None

Description

Function gets the text representation of the JSON array.

Exception is thrown if a handle to the JSON array is invalid.

Example

```
INT _arr  
_arr := %JSON_CreateArray()  
  
%JSON_ArrayAppendValue(_arr, "Will Smith")  
%JSON_ArrayAppendValue(_arr, "John Wick")  
  
TEXT _txt  
_txt := %JSON_ArrayToString(_arr)  
  
%JSON_FreeArrayHandle(_arr)
```
