

JSON_ArrayFromString

%JSON_ArrayFromString function

Function

Creates a JSON array from the string.

Declaration

```
%JSON_ArrayFromString(  
    TEXT in text  
)
```

Parameters

text	Text representation of the JSON array
-------------	---------------------------------------

Return value

Handle to the JSON array, must be allowed by [%JSON_FreeArrayHandle](#).

Description

The function creates a JSON field from the specified text representation of the field.

If the JSON array cannot be parsed from the text, an exception is thrown.

Example

```
INT _arr  
_arr := %JSON_ArrayFromString("[1,2,3]")  
  
%JSON_FreeArrayHandle(_arr)
```
