

PrevV

%PrevV function

Function

The function returns the previous value of the argument. Function usefulness - [Eval tags](#).

Declaration

```
UNIVAL %PrevV(  
    UNIVAL in Arg  
)
```

Parameters

Arg	Expression of optional type.
------------	------------------------------

Note

Based on the way of evaluation of eval tag the result will be:

- periodical eval tag - returns the value of argument valid during previous calculation,
- on-change eval tag - returns the previous value of the argument.
