

Installation of PostgreSQL Server and PostgreSQL ODBC Driver on CentOS

Installation from CentOS repository:

1. To install the PostgreSQL server, run:

```
sudo yum install postgresql-server postgresql-contrib
```

2. To initialize the database, run:

```
sudo postgresql-setup initdb
```

3. To start PostgreSQL, run:

```
sudo systemctl start postgresql
```

4. Turn on automatic PostgreSQL startup after OS startup:

```
sudo systemctl enable postgresql
```

5. To install the PostgreSQL ODBC driver, run:

```
sudo yum install postgresql-odbc
```
